Bitter Apricot Kernel

Bitter apricot kernel for cosmetic oil and industrial use — not for food.

The bitter apricot kernel is not for food; it is a different type from the sweet kernel and is kept separate in supply. Its main use is as a raw material for cosmetic oil produced by cold pressing; it is also used as an input in some industrial processes. It is separated from Malatya's apricot volume and prepared as a wholesale/export batch sorted into calibre groups. The sweet and bitter kernels are supplied in separate batches from harvest onward.

GENERAL AND LOGISTICS INFORMATION

Origin	**Malatya, Türkiye**
Use area	**Cosmetic oil, industrial process (not for food)**
Calibre	**Graded to request**
Moisture	**Typical reference range; if requested, a sample can be sent to an independent laboratory for confirmation**
