Ağın Roasted Chickpea

The well-known roasted chickpea of the Ağın region — prepared with the region's roasting tradition.

Ağın roasted chickpea is a type of chickpea roasted by the method unique to the Ağın district of Elazığ, with a distinctive aroma. The regional roasting technique gives the product its characteristic taste and crisp texture, and this sets it apart from standard roasted chickpea. A salted or plain option is offered to request, and calibre sorting is available. It is supplied packaged or bulk to regional-delicacy shelves and gift-packaging channels domestically, and to Turkish-cuisine product suppliers abroad.
