Apricot Shell Granule

A microplastic-free natural abrasive for cosmetic peeling and fine polishing — available in multiple calibres.

Ground from apricot kernel shell and available in different calibres, this granule abrades without scratching the surface thanks to its hard-but-friable structure; this property makes it stand out in cosmetic and delicate industrial applications. It rests on a solid source, supplied regularly from the apricot-processing season in and around Malatya. Following microplastic bans and shifting consumer demand, it has been sought as a natural, biodegradable alternative to plastic microbeads in face/body peeling products.

GENERAL AND LOGISTICS INFORMATION

Origin	**Türkiye / Malatya**
Product	**Ground, calibre-graded granule**
Calibre / mesh	**Available in different ranges (confirmed with a sample)**
Hardness · moisture	**Varies by batch — an exact figure isn't committed to**
Packaging	**Big-bag or sack**
Delivery	**Domestic (truck) · Export (FOB/CIF)**
INCI name	**Prunus Armeniaca Seed Powder**
CAS · EC No	**68650-44-2 · 272-046-1**
Sales unit	**Ton · Big-bag**
Category	**Industrial Granules**

For this product group, the name registered in the INCI inventory is Prunus Armeniaca Seed Powder; there is no separate INCI name for the shell.

KEY CHARACTERISTICS

- Microplastic-free, natural and biodegradable
- Hard but friable — abrades without scratching the surface
- Available in different calibre/mesh ranges
- Regular Malatya-origin source
- Available at cosmetic and industrial purity
- Safe use on delicate-alloy and aluminum surfaces

MAIN AREAS OF USE

- **Cosmetic Peeling** — Used in face/body peels as a natural, biodegradable abrasive ingredient in place of microplastic beads.
- **Skincare Formulations** — Featured as an abrasive ingredient in its finely ground form in cream- and gel-based exfoliation products.
- **Soft-Metal Blasting** — Cleans aluminum, brass and delicate-alloy surfaces without deforming them.
- **Fine Polishing & Lapping** — Provides a final treatment without scratching in the finishing of metal and plastic parts.
- **Optics & Delicate-Surface Cleaning** — Preferred for low-aggression cleaning on scratch-sensitive surfaces.

PACKAGING AND DELIVERY

25 kg sack or big-bag; for cosmetic applications, batches with a raised cleaning standard are available.

Shipment note: Regular shipments by the truck to domestic cosmetic and industrial plants, and by the container for export.
