Peach Kernel Shell Granule

A high-hardness granule — heavy blasting, lapping and activated-carbon feedstock.

Ground from peach kernel shell and available in different calibres, this granule is one of the hardest among shell granules. This property makes it preferred in demanding abrasion jobs such as heavy blasting, metal lapping and deburring. It is supplied regularly from peach-processing facilities in the Aegean and Marmara regions. Because of its high carbon content it is also used as a raw material for activated-carbon production.

GENERAL AND LOGISTICS INFORMATION

Origin	**Türkiye**
Product	**Ground, calibre-graded granule**
Calibre / mesh	**Available in different ranges (confirmed with a sample)**
Hardness · moisture	**Varies by batch — an exact figure isn't committed to**
Packaging	**Big-bag or sack**
Delivery	**Domestic (truck) · Export (FOB/CIF)**
INCI name	**Prunus Persica Seed Powder**
CAS · EC No	**84012-34-0 · 281-678-7**
Sales unit	**Ton · Big-bag**
Category	**Industrial Granules**

For this product group, the name registered in the INCI inventory is Prunus Persica Seed Powder; there is no separate INCI name for the shell.

KEY CHARACTERISTICS

- One of the hardest among shell granules
- Durable for heavy abrasion jobs
- High carbon content
- Available in different calibre/mesh ranges
- Natural, biodegradable

MAIN AREAS OF USE

- **Heavy Blasting** — Used in the aggressive cleaning of rust, thick coating and stubborn soiling layers.
- **Lapping & Deburring** — Preferred for deburring and surface-finishing on metal parts.
- **Activated-Carbon Feedstock** — Used as an input in activated-carbon production processes for its high carbon content.
- **Heavy-Industry Surface Prep** — Used to strip thick coatings on ship, industrial-tank and heavy-equipment surfaces.

PACKAGING AND DELIVERY

25 kg sack or big-bag; bulk big-bag shipment for industrial lines.

Shipment note: Regular shipments by the truck to domestic industry and by the container for export.
